Tips and Suggestions

Get help, clarifications, improvements

Do you feel like you need any help? Do you have any questions or need clarification about anything related to the class or an assignment? Do you want any further help in improving your performance or learning more in the class? Make a list, write your questions down, be specific.

Dig deeper, explore curiosities

Do you want to dig into a particular topic or assignment a bit deeper? Do you want to share your thoughts beyond what you added to your formal discussions or written assignments? Do you want to get more feedback from the instructor or hear their perspectives more directly? Think of what that might look like, be prepared to ask these questions.

Follow interests, relevance to major

Are you particularly excited or interested in something that you are learning about in the course? What is it? Why is that exciting to you? What else do you want to know about?

Are you finding the course particularly relevant to your other classes, your major, your work, or your career path? Could you use some conversation about these connections you are seeing or making?
